

If a conflict arises between a Clinical Payment and Coding Policy and any plan document under which a member is entitled to Covered Services, the plan document will govern. If a conflict arises between a CPCP and any provider contract pursuant to which a provider participates in and/or provides Covered Services to eligible member(s) and/or plans, the provider contract will govern. "Plan documents" include, but are not limited to, Certificates of Health Care Benefits, benefit booklets, Summary Plan Descriptions, and other coverage documents. Blue Cross and Blue Shield of Oklahoma may use reasonable discretion interpreting and applying this policy to services being delivered in a particular case. BCBSOK has full and final discretionary authority for their interpretation and application to the extent provided under any applicable plan documents.

Providers are responsible for submission of accurate documentation of services performed. Providers are expected to submit claims for services rendered using valid code combinations from Health Insurance Portability and Accountability Act approved code sets. Claims should be coded appropriately according to industry standard coding guidelines including, but not limited to: Uniform Billing Editor, American Medical Association, Current Procedural Terminology, CPT® Assistant, Healthcare Common Procedure Coding System, ICD-10 CM and PCS, National Drug Codes, Diagnosis Related Group guidelines, Centers for Medicare and Medicaid Services National Correct Coding Initiative Policy Manual, CCI table edits and other CMS guidelines.

Claims are subject to the code edit protocols for services/procedures billed. Claim submissions are subject to claim review including but not limited to, any terms of benefit coverage, provider contract language, medical policies, clinical payment and coding policies as well as coding software logic. Upon request, the provider is urged to submit any additional documentation.

### Evaluation of Dry Eyes

**Policy Number: CPCPLAB043**

**Version 1.0**

**Approval Date: April 29, 2024**

**Plan Effective Date: January 15, 2025**

### Description

BCBSOK has implemented certain lab management reimbursement criteria. Not all requirements apply to each product. Providers are urged to review Plan documents for eligible coverage for services rendered.

## Reimbursement Information:

1. For individuals suspected of having dry eye, testing of tear osmolarity **may be reimbursable** in **any** of the following situations:
  - a. To help determine the severity of dry eye disease;
  - b. To monitor effectiveness of therapy.
2. For individuals suspected of having dry eye disease based on comprehensive eye examination, testing for MMP-9 protein in human tears **is not reimbursable**.
3. For individuals suspected of having dry eye disease, testing for lactoferrin and/or IgE **is not reimbursable**.
4. For individuals suspected of having dry eye disease, all other testing not discussed above **is not reimbursable**.

## Procedure Codes

The following is not an all-encompassing code list. The inclusion of a code does not guarantee it is a covered service or eligible for reimbursement.

Codes
82785, 83516, 83520, 83861

#### Policy Update History:

Approval Date	Effective Date; Summary of Revisions
04/29/2024	01/15/2025: Document updated with literature review. Reimbursement information unchanged. References revised.

06/15/2023	06/15/2023: Document updated with literature review. Reimbursement information revised for clarity. References updated; some added, others removed.
11/1/2022	11/01/2022: New policy
